

# Snappy Ubuntu Core

The collaboration with Canonical has led us to the integration of Kaa and Snappy Ubuntu Core.

The following instructions explain how to build a Kaa endpoint SDK and use it with the Snappy Ubuntu Core platform.

...Instructions are coming soon...

To learn more about Snappy Ubuntu Core, visit the official [Ubuntu web site](#).

To learn more about Kaa, look at the following guides and references.

Guide	What it is for
<a href="#">Getting started</a>	Use it to quickly create your first Kaa application.
<a href="#">Design reference</a>	Use this reference to learn about features and capabilities of Kaa ( <a href="#">Endpoint profiling</a> , <a href="#">Events</a> , <a href="#">Notifications</a> , <a href="#">Logging</a> , and other features).
<a href="#">Programming guide</a>	Use this guide to create your own Kaa applications.
